

Burning coal and gas is damaging our climate. We want a sun-powered country!

Sign the petition and call on our elected representatives to #Repower Australia:

- Source all our power from sun, wind, and water by 2030
- Phase out polluting coal and gas-fired power and rule out new coal mines or gas fields
- Help affected workers and communities prepare for jobs with a future
- Make sure the transition is fair so everyone, everywhere has access to clean renewable energy
